CIPIO PARTNERS

Student Worker (m/f/d) Data Science in Growth Equity

Founded in 2003, Cipio Partners has been backing European growth stage technology companies for 20 years. We are providing growth capital to technology companies that have outgrown the venture stage and need a strong partner to fund their further growth. We are an independent and partner-owned firm with decades of investment and operational experience in the global technology industry. We operate as one team, work closely with entrepreneurs and can take decisions quickly.

We are seeking a **Student Worker (Data Science)** to support our data-driven investment approach. This is a great opportunity for a student with a passion for technology, data, and investments to gain hands-on experience in the world of technology investing.

Key Responsibilities and Requirements:

- Master or Ph.D. student with strong programming and data science skills
- Collaborate closely with the investment team to streamline data-driven decision-making and optimize workflows.
- Maintain and enhance codebases using scripting languages (e.g., Python) to ensure smooth automation and advanced data analysis (incl. AI).
- Set up and manage database solutions (e.g., MongoDB, MySQL) to support investment research and ensure effective data handling.
- Work with data APIs and LLM APIs (e.g., OpenAI, REST, GraphQL) to automate data collection and processing.
- Demonstrate a proactive, self-starter attitude with a high level of intellectual curiosity.
- Knowledge of advanced data analysis methods or machine learning techniques is a plus.

What We Offer:

- Take ownership of one of our projects focused on building an own data-driven deal sourcing tool.
- A great team environment with strong collaboration with the deal team.
- Mentoring and exposure to the full value chain of deal-making – from sourcing to execution.
- A chance to work closely with experienced investment professionals in a fast-paced, dynamic environment.

This role is ideal for someone looking to dive into the world of data science and investments while gaining valuable, real-world experience. Regular presence in our offices in Munich is required for this role. If you're excited about the opportunity to take on responsibility and work on impactful projects, we'd love to hear from you!

If you are interested, please send us your application, preferably starting in March/ April 2025, to:
